# Testing

**Feedback:** On October 14, we had a talk with Natalia Cuellar, another Bevisioneers colleague who works for the Guadalajara government. We want to start testing in her city with at least 10 Enerdrais wheels. These wheels are IoT devices that will send data about its energy generation and location to a remote server. With the aim of then launching a pilot program in other large cities such as Mexico City. Taking advantage of the fact that next year, in June/July, we will be hosting the 2026 World Cup, many of our devices could be implemented throughout the city.

In addition, on September we attended the Zero to Founder event in Estonia, Finland, and Sweden, where we presented the project to government officials, venture capital funds, universities, etc. realizing that, due to the current situation between Russia and Ukraine, energy generation ranks first or second in terms of investment interest, matched only by defense or artificial intelligence (DeepTech) projects, so we have the contacts and market research to pilot on other European cities like Tallin, Tartu, Helsinki and Stockholm.

In March we're establishing negotiations with Mexican governments to pilot on already established public bicycle transportation systems at GDL, CMDX and Quintana Roo, which are MiBici and EcoBici, with both government officials and real estate developers such as Estrategia Urbana and Urbanista to pilot our IoT devices, measuring data and fine-tuning preventive maintenance.

# Collaborations

1. **Natalia Cuellar - 2026 WorldCup Planning.**
  2. Guadalajara Government.
  3. We're making deals to make the first pilot of Enerdrais on the MiBici already established bike shared system with 10 IoT devices.
- 
1. **e-Residency team, Superangel VC, Palo Alto Club, Garage48, and Lift99.**
  2. Government officials, venture capital funds, and startup coworking companies.
  3. Attended the Zero to Founder event, where we received StartUp mentoring and masterclasses, also presented the Enerdrais project to government officials, universities and Venture Capital in Estonia, Finland and Sweden; with it received the estonian e-residency to open up an OÜ StartUp, so we can apply to grants, pilot the project in euopan cities, receive the StartUp VISA, etc.
- 
1. **Silver Kelk - Ülemiste City and Kristjan Lind - Bikeep.**
  2. Company of Real State/City Planner and Company of smart bike parking stations.
  3. Have presented the idea and we're in talks to pilot the Enerdrais project in Tallin, on the Ülemiste City section specifically, using the already stablished Bikeep smart parking stations.

1. **Kaido Kokk - Pärnu Innovation Competition.**
2. City of Pärnu and business campus Tehnopol.
3. Presented the project to an organizer of the event and told us to apply for the Parnu Smart City Innovation Fund which gives a 60000 EUR grant for smart city projects.

1. **Ivan Tito - GaltTec.**
2. Battery company.
3. In talks to collaborate with their energy storage microtubular solid oxide fuel cells to pilot and develop energy off grid stations at Tartu city.

1. **Olof Berglund - Sting and Fredrik Engströmer - Head of Innovation Region Stockholm.**
2. Non-profit organizations - Nordics largest startup ecosystem.
3. After presenting the Enerdrais project, we're in the process of refining the pitch deck to apply for the Sting Climate Race and Region Stockholm programs.

1. **Alejandro Alday - Mexico/Sweden Ambassador, Omid Ekhlas - TechArena.**
2. Mexico/Sweden Embassy, Entrepreneurship conferences.
3. Presented the project to the ambassador and got a lot of interest in the project because one of Stockholm's main goals is to transform it into a sustainable city, also at the same presentation got invited to next year's TechArena conference on February.

1. **Javier Jileta-Okholm - Ministry of Foreign Affairs in Mexico.**
2. Government official.
3. He's our contact to pilot Enerdrais on the EcoBici shared bike system in Mexico City, whom we met at the Zero to Founder Estonia event.

1. **Mauricio Raini.**
2. Individual.
3. In collaboration for the development of the Enerdrais app, which will receive the data sent by each of the IoT Enerdrais wheels, gathering energy generation (voltage and current), location, money savings, and environmental impact data.

1. **Luis Valdez - Muevetec.**
2. Company.
3. In collaboration for the manufacture of the Enerdrais wheels, Muevetec has the infrastructure and facilities to develop this project in scale because they own a workshop where they currently import raw materials from China and manufacture three-wheeler vehicles as made in Mexico

because I helped them obtain the WMI (World Manufacture Identity) certification, lowering their taxes outcome.

1. **Yejin Jo - We Go Earth.**
  2. BeVisioneers Fellow.
  3. In November we launched the first Enerdrais video on social media, which reached 10k viewers, giving our Startup its first media success, which encourages us to continue presenting in other conferences and attracted interest.
- 
1. **Moises Zapan - Estrategia Urbana.**
  2. Founder/Director of Estrategia Urbana, Real Estate Development.
  3. In December we pitched our IoT Enerdrais device and Stations to Estrategia Urbana, and we're currently in final stages of development of the electrical project to close the deal and put Enerdrais wheels and stations in all of their buildings in order to connect them and monitor their environmental impact.
- 
1. **Erika Danny Mulyadi - Surayaba Local Hub.**
  2. BeVisioneers Fellow.
  3. In February we were invited to present at the Surayaba Local Hub and share our experiences in pushing forward the Enerdrais project, being able to present it and being very close to piloting.

## Team Members

DIEGO CERVANTES - Mechatronics Engineer (CEO/CTO).

MAURICIO CERVERA - Director of Marketing and Social Media.

DAVID COOPER - CFO (Chief Finance Officer).

MAURICIO RAINI - Frontend Lead.

JORGE VALDEZ - Backend Lead.

SILVANA CERVANTES - COO (Chief Operating Officer).

LUIS VALDEZ - Sales and Operations Partner.

## Board Members

GUILLERMO CRUZ MOJICA - Sales and Operations Investor and Advisor.

# 12 Month Next Steps

1. Pilot at least 5 Enerdrais wheels and 1 energy hub in Guadalajara's MiBici bike-sharing system and/or EcoBici CDMX, collecting data on energy, environmental impact, and cost savings per wheel. This must be completed by January 2026 at the latest.
2. Reach to our contact at the Ministry of Foreign Affairs in Mexico to test at least 10 Enerdrais wheels in Mexico City's EcoBici bike-sharing system. In this case, we aim to obtain a letter of intent from EcoBici to purchase at least 200 wheels, collecting more data on environmental impact. This must be done before June/July next year to take advantage of the number of people who will be traveling around the city during the 2026 World Cup.
3. Contact the Swedish ambassador, the person in charge of the development of Ülemiste City, and the founder of Bikeep to pilot the project in Stockholm, Tallinn, and Tartu.

## Money

On average, how much income does your venture generate per month in EUR? (If applicable) \*

**19974.21 EUR (7 wheels and preventive maintenance).**

How much money do you need to sustain your venture operations for the next 12 months in EUR? **24509.36 EUR.**

How much of this required money do you currently have in EUR? \*

**5471.03 EUR.**

Based on your industry and the country where you are located, are you able to pay yourself a salary from your venture's income? **Full-time salary**

Based on your industry and the country where you are located, are you able to pay your employees a salary from your venture's income? **Full-time salary**

How many full-time employees are you able to pay? **8**

Bootstrapping with video campaigns and the Enerdrais website, Follow-up Grants with our OÜ, and Venture Capital Investment for funding and strategic PartnerShips.

CONCEPTO	INVERSION ANUAL EUROS	
SALARIO MANO DE OBRA	\$	144,000.00
SALARIO SOCIOS	\$	120,000.00
INVERSION COSTO PRODUCCION	\$	86,000.00
INVERSION MAQUINARIA	\$	150,000.00
GASTOS VARIOS SERVICIOS, RENTA ETC	\$	100,000.00
<b>TOTAL</b>	<b>\$</b>	<b>600,000.00</b>

## Key Milestones

BeVisioneers funding have contributed to this at the development of Enerdrais Core Wheel Mark III (Version 3) development, the creation of the team and the beta version of the web app and on travel expenses, helping us study the market and realize the current interest that european cities have on clean energy off grid sources.

- Pilot Enerdrais in one city (GDL, CDMX or Quintana Roo) to validate system integration, user experience, energy generation, return of investment and environmental impact CO2 data.
- Launch the beta version of the Enerdrais mobile app, including real-time energy tracking, gamification features, and social media sharing during the piloting, for data generation of CO2 impact, ROI, and Energy Generated per month.
- Market interest verification, obtaining multiple letters of purchase intent.

## Positive Impact on the Environment

Enerdrais will have a positive impact on the environment because it addresses the existing energy crisis in both America and Europe, as well as reducing the carbon footprint we generate in our daily lives, while also encouraging the use of bicycles, reducing the carbon print with 300 CO<sub>2</sub> tons per year.

In 2025, 37% of households in Mexico City do not have regular and constant access to electricity, and in Europe, due to the current situation between Russia and Ukraine, energy sources have suffered fluctuations such as the recent blackout in Spain. To solve this, Enerdrais will provide autonomous energy centers that will allow European cities to have energy independence and electric sustainability.

## Communities and Groups Benefited

- The urban traveler, the fitness enthusiast, the person striving for a healthier lifestyle → Every pedal stroke and every step we take wastes potential and kinetic energy, but with Enerdrais it can be measured, captured, and harnessed, so that our efforts are rewarded.
- City planners → Large cities such as Stockholm, London, Berlin, Mexico City, etc. have the potential to become fully sustainable. With daily urban commutes, we can harness that energy and transform cities into sources of clean energy.
- Large offices and real estate developers → An activity as mundane as commuting from home to work and back can become a reward system that measures and rewards our efforts to choose a more environmentally friendly transportation system, reducing our rent, giving us reward points, and powering the buildings we inhabit with our energy.
- Rural communities → Enerdrais hubs can also be implemented into rural communities so they can obtain energetic autonomy, not depending on current unreliable energy sources.

## Significant Change in Someone's Life

On 2025, while testing one of our early Enerdrais prototypes in Estado de México, we met Don Miguel, a 62 year old local bike courier who has been delivering food around the city for more than two decades. He told us that, lately, constant power outages in his neighborhood had made it harder for him to charge his phone and e-bike, forcing him to stop working for hours at a time.

When we installed one of our IoT Enerdrais wheels on his bicycle, we weren't expecting the emotional impact it would have. After a week of testing, Miguel told us that for the first time, I feel like I'm generating my own light. He showed us how, by simply riding his daily routes, he could now charge his devices and even power a small light at home. Beyond the technical success, it was the human side that struck us. Enerdrais gave him not just energy, but autonomy and pride, the feeling of contributing to something bigger, producing clean energy with every pedal. His story became a turning point for us, it proved that this technology wasn't just about sustainability or data collection, but about empowering people to take control of their energy and their future.

Today, we still think of Don Miguel whenever we talk about scaling Enerdrais to new cities. Because if one person's daily movement can light up their home, imagine what millions could do together.
